E130-HRX

ENERGY RECOVERY VENTILATOR 167 CFM at 0.20 in.w.g (ESP)

PRODUCT DESCRIPTION

The ideal in-suite ventilation solution for high-rise construction, the E130-HRX delivers exceptional performance in a compact, easy-to-install package only 9-1/4" in height. Easily concealed in a drop-ceiling or soffit, the E130-HRX has been thoughtfully engineered for apartments, condos, and all dwellings that use concrete-slab construction. The E130-HRX delivers up to **167 CFM** of fresh air at 0.20 in.w.g (ESP), enough for even the largest units in multi-family construction.

The E130-HRX includes EC motors, Aldes' exclusive FLEXControl, electronic calibration that eliminates the need for balancing dampers and improves overall efficiency. Cold Supply Air Prevention (CSAP) stops air distribution to the dwelling for 135-minute cycles if the supply air temperature is below freezing, reducing the risk of damage to downstream equipment.
